

### Vending Cart Regulations - Site and Size Specifications:

**VENDING CART.** A vending cart is a vending apparatus on wheels.

**PHYSICAL SPECIFICATIONS.** Vending carts shall conform to the following specifications:

1. The vending cart foot-print shall contain no more than fifty-six (56) square feet of area measured on a horizontal plane (exposed trailer tongue, axle and tires excluded). No portion of the cart shall exceed or extend beyond the actual assigned vending site size or the maximum vending site size of 10' x 12'.

2. The vertical height of the cart shall not exceed ten (10) feet measured from the ground level to the highest point in the cart including signage or other equipment, if any.
3. The vending cart shall not be of a mass produced or prefabricated type.

4. The cart shall be maintained in good repair and in a safe and sanitary condition.
5. The vending cart must have a securely fastened sign prominently displayed which identifies the business and its business name and a sign that lists food items and prices.
