Driver of Boat was Pulled From the Water By The City of Madison Lake Rescue Team

Yesterday, the City of Madison Lake Rescue Team members were called to Lake Monona for a Lake Rescue, receiving information from the 9-1-1 communications center that a man and his friend jumped in Lake Monona for a swim, but his friend never made it back to the boat.

The Lake Rescue Team headed for the boat and saw a person on-board, searching the lake with a spotlight. As they came close to the boat, they noticed the person was now in the water. The Lake Rescue Team members pulled the man from the water, while his boat circled the area. They secured his boat and brought both the man and his boat to shore, while other team members searched for the missing swimmer.

Please contact the Dane County Sheriff's Office for further updates on the search.
