

John Nolen Drive Reconstruction

Project Overview

The John Nolen Drive reconstruction project will involve improvements to the existing roadway, bridges, bicycle and pedestrian accommodations, and shoreline. This project will be planned and designed in coordination with the ongoing Lake Monona Waterfront Park project.

Project Goals

Increase safety for all users

(Vehicles, pedestrians, bicycles, and transit)

Replace aging infrastructure

(Roadways, bridges, and pathways)

Improve public lake front accessibility

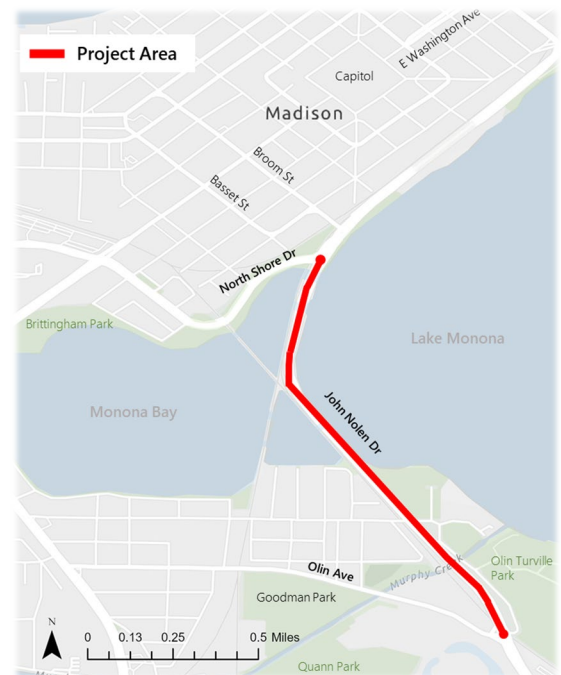

Improve mobility and environment for all users

(Vehicles, pedestrians, bicycles, and transit)

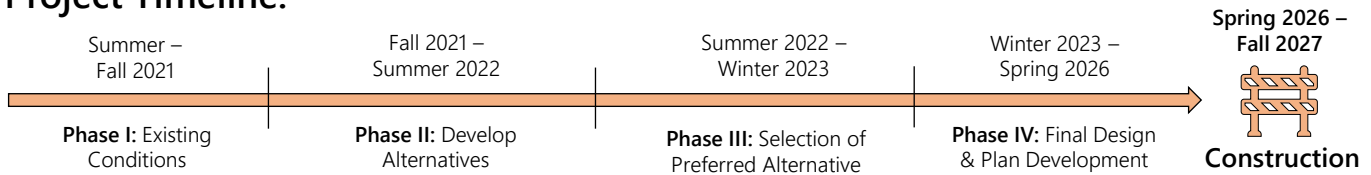

Minimize settling and movement of the causeway

Project Location

Project Timeline:

Tell Us What You Think About John Nolen Drive!

The community’s guidance is crucial to the success of this project. The project team has developed a public involvement plan that is informative, inclusive, and engaging – each phase of the planning process will utilize a range of interactive tools, including: social media posts, press releases, workshops, public meetings, focus groups, intercept interviews, surveys, and more.
