

City of Madison  
RFI 11037-0-2022-BP  
8/1/2022 Zoom Session

## Question and Answers

### Question 1

In terms of sustainability – how would you recommend we measure? 1 year? 5 year?

### Answer

Reduce our CO2 output by City operations. We aim to reduce by 30,000 tons per year by 2025.

### Question 2

What is magnitude of volume for EV charging stations?

### Answer

Should be many options – Level 2, Level 3. The City is particularly interested in public charging options.

### Question 3

Goal of reducing CO2 footprint by 2025 – when do you want to get started?

### Answer

We have already gotten started. We're trying to do things as quickly as possible.

### Question 4

Can you share anything around selection process? Is there a plan for an RFP to follow?

### Answer

We are representing 30+ agencies – different agencies need different things at different times. The sooner you send in info, the better.

### Question 5

For RFPs – are those strictly having to do with CO2 goals? Or anything?

### Answer

It's for everything the City purchases. We're hoping to get a smaller carbon footprint. Please see the list of example services provided on the RFI website.

### Question 6

How does process work in terms of once a vendor has sent info?

### Answer

We are going to be creating a database. No guarantee is being made. The hope is we will be able to pass along information to each agency.

### Question 7

For Outside of City/State entities – are these encouraged?

### Answer

Yes, all entities are encouraged.
