To: Dave Schmiedicke, Finance Director

From: Michelle Drea, City Assessor

Date: July 9, 2021

Subject: 2022 Operating Budget Transmittal Memo

Major Goals

The Assessor's Office provides three statutory duties for the City: to discover, to list, and to value all property within the City. Our duties fall under the citywide element of Effective Government. In addition to City values, we operate with a belief in supportive relationships and work environment, respect, quality and data driven outcomes, and continuous improvement.

Through the efforts of dedicated employees, we deliver the highest quality services to City taxpayers by: (1) establishing fair and equitable assessments of all taxable real and personal property; and (2) maintaining complete and accurate assessment rolls and property records as required by state statute.

Assessments

Establishing fair and equitable assessments of all taxable real and personal property provides the requisite foundation for property taxation. Property taxes provide 70% or more of the revenue for the City. This foundational work must be completed accurately and efficiently. We leverage resources to access data and apply best practice appraisal techniques to set assessments. Once assessments are established, our office supports the assessments through various stages of appeal from Board of Assessors to Board of Review to Circuit Court and beyond. It is critical that our initial assessments are accurate and supportable to diminish resources spent in the appeal process. This requires talented personnel and reliable data.

Data

Maintaining complete and accurate assessment rolls and property records as required by state statute provides critical infrastructure for the City. The goals of the Effective Government element are: (1) to have efficient and reliable public utilities, facilities, and services that support all residents; and (2) to collaborate with other governmental and non-governmental entities to improve efficiency and achieve shared goals. The property data collected and maintained by the Assessor's Office is integral to achieving these goals. The who, what, and where of property are all tracked in our data. Not only is the property data important to understand and achieve our goals, it is the most widely accessed by citizens per IT statistics. Our property look up page has the most traffic of any other webpage in the City.

COVID Recovery

Market data is crucial for creating effective COVID recovery models. In order to promulgate recovery efforts, the impact of COVID must be understood. This cannot occur without market data around our residential and commercial property markets. This data allows for targeted and efficient responses to those who have been impacted most. This effort is supported through our data collection efforts and reflected in our assessments.

Our service delivery is impacted by the loss of field inspections. Accurate data cannot be collected without appropriate tools. Field inspections are one of the most heavily relied upon tools in our data collection efforts. These inspections are triggered by permits and sales. For permits, field inspections allow our office to quantify the work completed (roof, deck, remodel) and the quality class of the work for valuation purposes. For sales, inspections allow our office an actual view of the property to confirm listed property attributes, quality grading, and evaluate market data for the sale. Considering the current data available from Public Health, we anticipate field inspections to resume in 2022.

Without field inspections, we have to rely upon digital tools to assist in data collection. CoStar, MLS, and Pictometry are the three digital sources we currently have available. We are engaged in an ongoing effort to be creative in accessing this data. This includes expanding the scope and range of subscriptions to these services.

For our Open Book period, we partnered with IT to further develop the online portal for property owners to provide our office with information and integrated the objection process. Further capitalizing on this opportunity, we added a portal to allow property owners to provide sales and permit data.

2022 Request & Equity

Without accurate data and assessments, the potential for an inequitable shift of the tax burden is significant. These shifts can cause those who have the most to pay less and those who have the least pay more proportionally. The route to our levy is created by state statute and is filled primarily by property taxes. If property assessments are inaccurate or inequitable, the result will be a shift in the tax burden. Diligent and talented staff using effective tools within a system governed by the Department of Revenue prevent this from occurring.

Further, it is the Assessor's responsibility to have knowledge of and intercede, when appropriate, with proposed or pending legislation that might increase this potential. Property assessment and taxation legislation and case law are powerfully impactful to equity. Our interactions with those systems must be consistent and effective. A recent example is successfully advocating against repealing the personal property tax.

Finally, the data collected and codified by the Assessor's Office may be beneficial in illustrating where disparities and solutions might exist in our community. For example, in our office, data around the number and availability of low income housing is mainly tracked through property tax exemptions. Providing information regarding the availability of exemptions and requiring strict adherence to statutory requirements is a function ascribed to the Assessor. These are continuous efforts for our office.

2022 Request & Sustainability

A stated goal under the Green and Resilient element of our Comprehensive Plan is that Madison will be a leader in stewardship of our land, air, and water resources. The Assessor's Office interacts with this goal in two ways. First, our data allows evaluation of resources within the City. All parcels and lots are codified with appropriate use acknowledged. This is foundational to quantifying where resources are best spent toward the stated goal.

Second, in an internal sustainability improvement process, our paper processes are being consciously deconstructed in preparation for our new CAMA/Valuation Technology System. This saves paper and the energy of constant printing of hundreds of permits and sales transfers. Further, it allows staff the opportunity to think through the changes in process and refine as we

near adoption of new technology. An added benefit of this approach regards change management. Tackling the paper processes before adopting the technology breaks the change into navigable chunks resulting in improved morale and processes.

Major Changes in 2022 Operating Request

Our agency request does not include any changes from the cost to continue budget.

Summary of Reductions

The Assessor's Office budget is lean. At the start of my tenure in 2018, we began to research and implement office efficiencies. For example, we have completely eliminated overtime. This represents an average savings of \$5,000 per year. Further, our office reorganization in 2019 resulted in a savings of \$41,200. The effort and results of the robust continuous improvement in our office budgeting means that we do not have excess, outside of personnel, to offer for reduction.

The reorganization resulted in an efficient and effective small team doing impactful work. However, it also resulted in a lack of positions that can go unfilled without significant consequence. When evaluating our staffing, it was critical to our management team to avoid any lay-offs. The first proposed reduction would be to not fill a vacant Assessment Technician position. Unfortunately, to reach the 5% reduction we would need to eliminate a currently filled Assessment technician position as well.

Each Assessment Technician is responsible for capturing approximately \$214,000,000 in new construction value each year by gathering, analyzing, and verifying all new construction data in the City. New construction value is the sole mechanism by which the levy can be increased. This levy increase (new construction) equals \$4,800,000 in tax revenue. There is no other staff available to fill this gap. New construction data would be lost.

It is the Assessor's responsibility to ensure all parcels within the City are valued uniformly. This requires accurate data. The Assessment Technician staff is solely responsible for gathering the initial property data upon which all valuations rely. Furthermore, the Assessor's job goes beyond the discovery, valuation, and listing of property. When communicating with the public, the Assessor needs to demonstrate professionalism, accuracy, honesty, and integrity. Without accurate data, this is an impossible task.

ACTIVITIES PERFORMED BY THIS SERVICE

Activity	% of Effort	Description
Discover Property	30	The discovery function includes gathering, analyzing, and verifying all property data.
Listing Property	20	The listing function includes maintaining maps and records of all property in the City. Maintaining records involves updating real and personal property attributes such as land divisions, ownership changes, legal descriptions, building characteristics, and creating new building records for new construction.
Valuing Property	40	It is the assessor's responsibility to ensure the parcels within the district are valued uniformly. Valuation involves rigorous statistical analysis using data acquired through the listing and discovery functions. Also, this function includes defending values in settings such as Board of Assessors, Board of

nmunications and Required Reporting	10			The assessor's job goes beyond the discovery, valuation, and the listing of property. When communicating with the public, the assessor need
				to demonstrate professionalism, accuracy, honesty and integrity.
				State statutes require a variety of reporting from our office. This includes the Municipal Assessment Report and Statement of Assessment. The calculations derived from data submitted on these reports directly impact the levy, aid payments, and our taxing capacity.

ssessment Technician. xplain the impacts of the proposed reduction on the end user of the service. Summarize these impacts in the context of the question	s asked in Part 2 of th
ow can impacts of this reduction be mitigated?	
ach Assessment Technician is responsible for capturing approximately \$214,000,000 in new construction value each year by gathering lew construction data in the City. New construction value is the sole mechanism by which the levy can be increased. This levy increased 4,800,000 in tax revenue. There is no other staff available to fill this gap. New construction data would be lost.	
: is the Assessor's responsibility to ensure all parcels within the City are valued uniformly. This requires accurate data. The Assessmen esponsible for gathering the initial property data upon which all valuations rely. Furthermore, the Assessor's job goes beyond the disc	overy, valuation, and
f property. When communicating with the public, the Assessor needs to demonstrate professionalism, accuracy, honesty, and integril his is an impossible task.
