TO: Mayor Satya Rhodes-Conway and David Schmiedicke, Finance Director

FROM: Sarah Edgerton, Information Technology Director

DATE: July 24, 2024

SUBJECT: 2025 IT Operating Budget Transmittal Memo

CC: Katie Crawley, Deputy Mayor, Sam Munger, Deputy Mayor, Maggie McClain,

**Budget Analyst** 

The City of Madison's technology needs are continuously evolving as we grow as a City and change the way work is done or a service is delivered. These needs range from current operations, such as public safety, to automation of work processes which are increasingly more data-intensive, to the growing use of Cloud services and developing scaffolding for the use of Smart City and AI technology in City operations. Furthermore, as the City continues to grow, there will be a greater demand for the accelerated use of technology to deliver convenient and accessible services to our residents.

The <u>Information Technology (IT) 2024-2027 Strategic Plan</u> sets the vision and direction to mature as an organization, and to create a secure, accessible, transparent, digital experience for all our customers. The IT Strategic Plan focuses on seven strategic areas: **Customer Experience**, **Digital Inclusion**, **Digital Workplace**, **Employee Engagement**, **Enterprise Business Solutions**, **Infrastructure & Operations and Security**. These are key strategic areas used to create a unifying vision for the City's focus around digital technologies and to ensure strategic investments are made to provide the most value to the City.

We use the IT Strategic Plan to guide the development of our budget programs and work plan. The IT Work Plan outlines our major projects for the upcoming budget year. By aligning our Strategic Priorities, Budget Programs, and Work Plans, IT Leadership can ensure that our investments are furthering our organizational goals. To maintain this alignment, we use our IT Service Framework and performance indicators identified through Results Madison to analyze our service delivery and provide us with insight into our department's performance. Results Madison data also provides IT Leadership insight into current and future technology needs, and we can incorporate them into IT's budgeting and strategic planning. 2025's project work includes the following key highlights:

- Digital Workplace: M365 Phase 2 SharePoint Rebuild and Teams Expansion Project
- Security, Risk & Compliance: Upgrading the City's Information Security Infrastructure
- Security, Risk & Compliance: PCI Compliance Upgrades
- Infrastructure and Operations: Network Infrastructure Lifecycle Management Replacements
- Customer Service: Creating a Customer Service Ecosystem
- Digital Workplace: Accela Migration to the Cloud
- Collaboration, Communication & Portfolio Management: Standardizing the project intake process

### 99% Budget for Information Technology

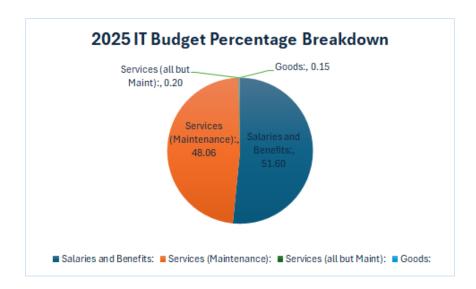

For 2025, our target has been set to 99% of our Cost-to-Continue budget, \$10,920,651. To meet the 1% reduction, \$110,309, we have moved two of our 2025 software implementation projects into our 2024 Work Plan. Moving forward, the current software will be discontinued. Our reductions total \$182,000.

- Reduction of \$107,000: The first project is to replace redundant anti-virus software in 2024 instead of 2025.
  - **Impact:** There will be a slight shift in project timelines to account for the change to 2024 work planning.
- 2. **Reduction of \$75,000:** As part of the SharePoint Online modernization project, we will discontinue funding KnowledgeLake software which provides more advance look-up functionality for one agency. After analyzing the advance software functionality vs. the cost of the software and the number of users, the cost of the software outweighs the needs of the additional features. The basic needs can be met by other enterprise systems, which we will work with the impacted users to transition their toolset.
  - **Impact:** Search features will not be as robust; however, users will still be able to do their jobs efficiently and effectively.

## Lower Priority Service Activity Identification for Information Technology

The IT Operating budget is comprised of two major funding priorities: Salaries and Benefit (\$6,698,820) and Services (Maintenance) (\$6,238,927) for a total of \$12,937,747. Over the past four years, we have been navigating rising prices for IT supplies, services, and talent which has increased the IT Services funding. This increase is also due to the costs for Cloud-services (M365, City Website Platform and Data backups, to name a few). As vendors move to only continuing to support and maintain the security of systems in their cloud environments, we will continue to see a rise in IT's Operating Services budget. As part of our reduction scenarios, we are unable to consider reducing software since it supports the City's core services. We had to focus our analysis on the 51% of the IT Operating Budget, Salaries and Benefits, for our reduction scenarios.

We worked with Team Leaders to identify core services and activities performed in each teams' technology services portfolios. As part of the exercise, they identified what core City services would be impacted if there was a reduction of their service delivery. Once we had the services identified and pulled Results Madison data, we were able to make informed decisions in developing our 5% proposed services reduction scenarios.

Our proposed reductions are based on the following indicators: Identification of core services; Results Madison data; ability to expedite project completion to replace redundant software in 2024 instead of 2025; and the evaluation of vacant positions and assigned duties to ensure alignment with current and future technology projects. From this analysis, we propose the following scenarios:

#### Scenario 1

- \$107,000, Reduction of ESET software: Expediting project completion to replace redundant software in 2024 instead of 2025.
  - **Impact:** Staff will have to shift work assignments to expedite completing the project. Should be minimum impact.
- \$75,000, Reduction of KnowledgeLake software: Expediting project completion to replace oneoff software in 2024 instead of 2025 since there is only one department that uses KnowlegeLake.
  Impact: Although it will not be an exact same user-experience, users will still be able to
  efficiently do their jobs.
- 3. \$153,000, Reduction of one vacant position in the Web Team staffing model after evaluation of vacant positions and assigned duties to ensure alignment with current and future technology projects. The amount allocated to this reduction scenario is due to a long-term employee retirement. Due to a long-term employee retirement, we had the opportunity to evaluate the position description, the current and future IT project work needs and where we would need to re-assign talent. With that analysis, I am reassigning a team member from web development to

application development to support the increase workload that will be forthcoming with several major systems migrating to the Cloud in the next few years.

**Impact:** This created a vacant position on the Web Team who had three core services in the position's portfolio: Support of Metro's One Bus Way API (will be discontinued in August with the implementation of the Clever system); Social Media Support & Tools (Agorapulse, Hootsuite) will be discontinued; web application development.

The discontinuation of these services will not majorly impact core continuity of operations for IT. Web project timelines will need to be adjusted by 6 to 12 months to accommodate the staffing level reduction. This change would result in a reduction in database support services and a redistribution of duties to other members of the Team, which may slow down other database administration work. It is not an ideal scenario to lose the Web Team position; however, work will be completed but in longer timeframes.

4. \$47,000, Reducing one position from an Information Technology Specialist 4 (18/12) to an Information Technology Specialist 2 (18/8) position: After evaluation of current vacant positions and the assigned duties to ensure alignment with current and future technology projects, we feel that work can be completed at an 18/8 level with minimal impact to core service delivery. Impact: May slow down some GIS and asset activities however it could create a more cohesive GIS and asset community in the City. We would like to develop a GIS Consortium to support the reduction of the GIS position from an 18/12 to 18/8 and ask other flagship GIS staff to assist in the support of the GIS system. We will continue to cover the costs and will ask the consortium to support each other. We feel with the investment of GIS and asset experts across the City, we can create a GIS and asset cooperative to support one another and take on some of the activities that the previous position oversaw. This will give agencies more autonomy in the use of these systems. IT will support the database administration, user administration and vendor relationships.

#### 5. \$177,754, Reduction of IT non-core services:

- a) Discontinue coverage of the Alcohol, License and Review Committee (ALRC) meeting The Alcohol, License and Review Committee meeting is currently virtual and takes two full-time staff members to support.
- b) Discontinue coverage of the Common Council Executive Committee (CCEC) meeting Staff must be in two hours earlier to support the CCEC and Common Council Meeting which is creating overtime.
- c) Discontinue coverage of the Transportation Commission (TC) meeting The Transportation Commission meeting is currently virtual and takes two full-time staff members to support.
- d) Reduction coverage of the Finance Committee to in-person only and covered live by Media Team
- e) Discontinue supporting edited podcasts., such as, "Everyday Engineering"; we would only support automated podcasts, such as, "Common Council Meetings."
- f) Discontinue show productions, such as, District Reports or Senior Beat
- g) Reduction Hybrid, Streamed, and Televised Event Coverage (Presentations, Press Conferences, Public Information Meetings, Etc.)
- h) Reduction in mobile multi-event coverage.

- i) Reduction in project requests (educational, documentaries, training videos, public service announcements and how-to-videos).
- j) Reduction in Special Event coverage, such as the Madison Police Department Awards Ceremony or Annual City-County Observance of Dr. Martin Luther King, Jr. Day.

**Impact:** With the reduction of these listed services, the Media Team staffing model would be reduced by two positions due to the decrease in services. Currently there is one vacant position and one filled position. The proposed reductions to Media Team's portfolio of services are based on the following data indicators:

- Core service identification (See attached IT Strategic Framework)
- Viewership/use of service (See attached Media Data Indicators Report, Meeting and Event Viewership)
- Meeting coverage accrues the most overtime for staff. Media Team staff are in comp group 16, with handbook rules that state they receive overtime daily over 7.75 hours and an extra pay differentia premium for working nights. Therefore, flexible scheduling is not an option for their work schedules. (See attached Media Data Indicators Report, Media Team Overtime)
- Registrant participation/use of service (See attached Media Data Indicators Report, Registrant Participation)
- Digital inclusion impact: When reviewing data, the most viewed videos are not meetings or special-event coverage; instead, they are educational videos, or documentaries which are generally more relevant for a longer period and have variety of mediums for distribution. These types of videos have a broader community reach since they are often-times produced in multiple languages and have closed-captioning and are produced for more targeted audiences which lend themselves for better sharing and better engagement with community needs. The viewership data demonstrates that residents are seeking targeted information like "How to Fill and Replace Sandbags" (18,000 views) or "Xov Xwm Tseem Ceeb Txog Kab Mob Coronavirus (Important Message About Coronavirus)" (29,000 views) (See attached Media Data Indicators Report, on YouTube Video views)

#### Scenario 2:

Our proposed reductions of services are based on the following indicators: Identification of core services; Results Madison data; expediting project completion to replace redundant or one-off software in 2024 instead of 2025; and evaluation of vacant positions and assigned duties to ensure alignment with current and future technology projects. From this analysis, we propose the following:

- \$107,000, Reduction of ESET software: Expediting project completion to replace redundant software in 2024 instead of 2025.
   Impact: Staff will have to shift work assignments to expedite completing the project. Should be
  - minimum impact.
- 2. **\$75,000**, **Reduction of KnowledgeLake software:** Expediting project completion to replace one-off software in 2024 instead of 2025 since there is only one department that uses KnowlegeLake. **Impact:** Although it will not be an exact same user-experience, users will still be able to

efficiently do their jobs.

3. \$153,000, Reduction of one vacant position in the Web Team staffing model after evaluation of vacant positions and assigned duties to ensure alignment with current and future technology projects. The amount allocated to this reduction scenario is due to a long-term employee retirement. Due to a long-term employee retirement, we had the opportunity to evaluate the position description, the current and future IT project work needs and where we would need to re-assign talent. With that analysis, I am reassigning a team member from web development to application development to support the increase workload that will be forthcoming with several major systems migrating to the Cloud in the next few years.

**Impact:** This created a vacant position on the Web Team who had three core services in the position's portfolio: Support of Metro's One Bus Way API (will be discontinued in August with the implementation of the Clever system); Social Media Support & Tools (Agorapulse, Hootsuite) will be discontinued; web application development.

The discontinuation of these services will not majorly impact IT core service delivery. Web project timelines will need to be adjusted by 6 to 12 months to accommodate the staffing level reduction. This change would result in a reduction in database support services and a redistribution of duties to other members of the Team, which may slow down other database administration work. It is not an ideal scenario to lose the Web Team position; however, work will be completed but in longer timeframes.

- 4. \$47,000, Reducing one position from an Information Technology Specialist 4 (18/12) to an Information Technology Specialist 2 (18/8) position: After evaluation of current vacant positions and the assigned duties to ensure alignment with current and future technology projects, we feel that work can be completed at an 18/8 level with minimal impact to core service delivery. Impact: May slow down some GIS and asset activities however it could create a more cohesive GIS and asset community in the City. We would like to develop a GIS Consortium to support the reduction of the GIS position from an 18/12 to 18/8 and ask other flagship GIS staff to assist in the support of the GIS system. We will continue to cover the costs and will ask the consortium to support each other. We feel with the investment of GIS and asset experts across the City, we can create a GIS and asset cooperative to support one another and take on some of the activities that the previous position oversaw. This will give agencies more autonomy in the use of these systems. IT will support the database administration, user administration and vendor relationships.
- 5. \$88,877 Reduction of IT non-core services:
  - a) Discontinue coverage of the Alcohol, License and Review Committee (ALRC) meeting
  - b) Discontinue coverage of the Transportation Commission (TC) meeting
  - c) Reduction coverage of the Finance Committee to in-person only and covered live by the Media Team
  - d) Discontinue supporting edited podcasts., such as, "Everyday Engineering"; we would only support automated podcasts, such as, "Common Council Meetings"
  - e) Discontinue show productions, such as, District Reports or Senior Beat

f) Reduction in Special Event coverage, such as the Madison Police Department Awards Ceremony or Annual City-County Observance of Dr. Martin Luther King, Jr. Day.

**Impact:** With the reduction of these listed services, the Media Team staffing model would be reduced by one position due to the decrease in services. Currently there is one vacant position which would be reduced to meet our reduction scenario. The proposed reductions to Media Team's portfolio of services are based on the same previously listed indicators. It is not an ideal scenario to lose the Media Team position; however, work will be completed but in longer timeframes and there will be fewer opportunities for press conference and special event coverage.

I look forward to discussing our IT 2025 Operating Budget with you.

Sincerely,

Sarah Edgerton, Chief Information Officer

City of Madison Information Technology Director

# 2025 Operating Budget Service Budget Proposal Form

Part 1. Identifying Information				
Select your Agency:	Information Technology			
Enter your Service:	Business Solutions			

Please provide an updated Service Description below.

If this is an existing service, please see the "Service Description" in the <u>2024 Adopted Budget</u>. Write "No change needed," if applicable. Otherwise, please provide a complete updated description.

If this is a new service due to the agency's Results Madison restructure, please provide a 2-4 sentence description of the service and its goals.

#### **Updated Service Description:**

This service supports enterprise business applications, system implementation, development, enhancements, and database systems. The goal of this service is to deliver and support the innovative, integrated, cost-effective enterprise solutions to our customers to support the City's growing technology needs.

Please provide updated Activities Performed by Service.

If this is an existing service, please see the "Activities Performed by Service" in the 2024 Adopted Budget. Write "No change needed," if applicable. Otherwise, please provide a complete updated list of activities.

If this is a new service due to the agency's Results Madison restructure, please provide a list of major activities using the format *Activity Name: Description*.

- Accela Code Enforcement, Licensing and Permitting, and land management: Provide services online, including initial application, fee calculations, renewals, and tracking.
- ESRI GIS: Support the City-wide GIS consortium and providing a foundation for mapping and analysis that is used in City-wide.
- CityWorks Work Order and Asset Management: Support the backend of CityWorks which creates work order jobs and connects the assets to each work order.
- Financial and Billing System: Maintain the back end of the City-wide financial management software application which manages the City's accounting, billing, and procurement requirements.
- Website Content Management System (CMS): Develop, maintain, and upgrade the Drupal CMS for users to publish, edit, modify, organize and maintain content from the City's Website.

- Reporting Tools: Support a set of graphical and scripting tools that support the development and use of reports City-wide.
- Camera Management System: Manage the Digital Security Camera infrastructure, including user roles, permissions, views and streams.
- Deploying and Installing Software Packages: Make software applications available for installation and use on various computers.
- Photo Library Management System: Manage and store the City's digital photos.
- Application Configuration and Administration: Manage City-wide applications lifecycle (requirements, design, implement, test, build, deploy, operate, optimize).
- Application Programming Interfaces (APIs): Develop protocols that enables City software applications to communicate with each other to exchange data, features, and functionality.
- Cloud Strategies: Increase our flexibility, sustainability, and uptime by shifting to a cloud-first strategy.
- Online (ePayment System) Payments: Develop and maintain the City's 14 ePayment types.

Agencies can propose net neutral reallocations within their budget but must explain changes of \$10,000 or more at the **Major level**.

Examples of changes that **do** need to be detailed:

• Moving \$10,000+ from one Major to another Major

Examples of changes that do not need to be detailed:

- Total changes of less than \$10,000 at the Major level.
- Object level changes do not need additional justification if the net change to the Major is less than \$10,000. For example, if you propose moving \$15,000 from Consulting to Software within the Purchased Services Major, you do not need to detail the change.

If the proposed changes are a technical correction to the agency's base budget, simply state that the change is a correction/adjustment in the narrative questions below.

#### Summary Table of *Major* Changes of \$10,000 or More

Complete the table below to detail changes at the Major level and answer the narrative questions to describe your changes. If there are no significant changes, skip this section

# 2025 Operating Budget Service Budget Proposal Form

Part 1. Identifying Information				
Select your Agency:	Information Technology			
Enter your Service:	Collaboration, Communication & Portfolio Mgmt			

Please provide an updated Service Description below.

If this is an existing service, please see the "Service Description" in the <u>2024 Adopted Budget</u>. Write "No change needed," if applicable. Otherwise, please provide a complete updated description.

If this is a new service due to the agency's Results Madison restructure, please provide a 2-4 sentence description of the service and its goals.

#### **Updated Service Description:**

This service supports increased access to shared online services, opportunities for collaboration and continuing the transition of modernizing paper-based processes to digital processes to meet the needs of our customers. The Portfolio Management service performs IT-to-business relationship management functions, owns and manages the City's IT governance and project portfolio processes.

Please provide updated Activities Performed by Service.

If this is an existing service, please see the "Activities Performed by Service" in the 2024 Adopted Budget. Write "No change needed," if applicable. Otherwise, please provide a complete updated list of activities.

If this is a new service due to the agency's Results Madison restructure, please provide a list of major activities using the format *Activity Name: Description*.

- Product Management: Develop a better understanding of customers' needs, goals, and values. Develop solutions based on the people who will use the technology.
- Project Management: Develop standard frameworks for project management across teams to give project managers the tools they need to complete successful projects.
- Customer Lifecycle Management: Tracking IT service delivery from multiple customerrelated metrics to ensure service delivery is completed to an agreed upon level of satisfaction.
- Agency Partnerships: Develop a better understanding of customers' needs, goals, and values
- Customer Experience: Build trust with our customers to provide solutions that meet their needs and enhance their experience at the City of Madison.
- IP Telephony Lifecycle Management: Manage the City's IP telephony system lifecycle including administering, managing, and maintaining.

- Collaboration Tools and Digital Workplace Applications: Support conferencing, collaboration, and file sharing technologies.
- Adoption-Change Management: Drive customer and staff adoption and satisfaction.
- Training: Improve the use and efficiency of technology by making sure our customers understand the systems they use.
- Service Level Agreements (SLAs): Develop clear expectations for IT, external partners, and customers to ensure that service delivery is completed to an agreed upon level of satisfaction.
- Vendor Coordination: Oversee the third-party vendors providing IT products and services.

# 2025 Operating Budget Service Budget Proposal Form

Part 1. Identifying Information		
Select your Agency:	Information Technology	
Enter your Service:	Digital Inclusion & Experience	

Please provide an updated Service Description below.

If this is an existing service, please see the "Service Description" in the <u>2024 Adopted Budget</u>. Write "No change needed," if applicable. Otherwise, please provide a complete updated description.

If this is a new service due to the agency's Results Madison restructure, please provide a 2-4 sentence description of the service and its goals.

#### **Updated Service Description:**

This service develops and supports new technology and online systems, which improve accessibility and interaction with City services. This service works to improve digital engagement tools and practices, user experience, accessibility, and language access for Madison residents.

Please provide updated Activities Performed by Service.

If this is an existing service, please see the "Activities Performed by Service" in the <u>2024</u> <u>Adopted Budget</u>. Write "No change needed," if applicable. Otherwise, please provide a complete updated list of activities.

If this is a new service due to the agency's Results Madison restructure, please provide a list of major activities using the format *Activity Name: Description*.

- Digital Access: Create opportunities for residents and City staff to access City services and engage in City government more comfortably, securely, and equitably through technology.
- User Interface and Design: Evaluate systems for ways to improve service design, website navigation, and user experience.
- Resident Engagement Tools: Transform how people participate in the democratic process by facilitating an interactive, safe, and accessible relationship between the government and the public through technology.
- Board, Commission, and Committee Coverage: Continue to encourage the ease of access to City information through technology solutions.
- Digital Workplace: Maintain a digital workplace by creating a framework for continual improvement of processes, tools, and operational efficiencies to meet our employees' needs and the City's goals.
- ADA Digital Accessibility: Increase equity and access to City services by improving the accessibility of the City's web presence.

- Government Access Television: Use technology to effectively connect the public to City government.
- Audio/Visual Services: Support video conferencing and collaboration technologies that allow employees to do their work efficiently and effectively.
- Language Access: Develop and support sites and applications that support multilingual content. Engage the City workforce in greater plain language adoption.
- City of Madison website: Continue to build a unified digital identity.
- City Podcasts: Continue to encourage the ease of access to City information through technology solutions.
- City Streaming Video Services: Continue to encourage the ease of access to City information through technology solutions.
- Digital Signage: Continue to encourage the ease of access to City information through technology solutions.
- Communication Marketing Tool Lifecycle Management: Develop and implement style guidelines shared across systems. Standardize infrastructure, functionality, user experience, and appearance using human-centered design.

If yes, complete the "Position Allocation Change Form" and submit as part of your proposal.
Reclassifications: Does your proposal reclassify existing positions?  ☐ No − No reclassifications  ☐ Yes − Includes proposed reclassifications
If yes, provide the position number and briefly describe the change: Click or tap here to enter text.
# of FTEs: Does your proposal change the total number of FTE positions?  \[ \Boxed No - No change to # of FTEs \] \[ \Boxed Yes - Includes proposed change to # of FTEs \] *Note: If "Yes," the proposed change must be net neutral to the target budget, and salary and benefits must be considered when computing the cost of the change.  If yes, provide the position classification and briefly describe the change:
Click or tap here to enter text.
Explain the impact of your proposed personnel change(s). Will there be a change to current activities or service levels? Why is this change needed in the 2025 budget?
Click or tap here to enter text.
Explain how your proposed personnel change(s) will align with your draft Department Equity Action Plan. Will the change(s) address specific inequities or advance other equity goals?
Click or tap here to enter text.

#### **Service Identification Form**

Each agency funded by the General, Library, and Fleet funds ws required to submit a list of lower priority service activities equal to at least 5% of the agency's 2025 cost to continue budget while preserving core service activities. Metro Transit and Public Health were required to submit a list of activities equal to 5% of the General Fund subsidy to those agencies.

Agencies were allowed to propose fee or charge increases on service activities as a way to meet the 5% target. Budget guidance dictated that these proposals be on service activities primarily provided to those with the ability to pay.

Agency Information Technology - Scenario 1

5% Minimum Target546,033Total Amount Identified559,754

Service (Choose from drop-down list)  174 - SECURITY AND COMPLIANCE	Activity (Narrative Description)  Expediting project completion to replace redundant software in 2024 instead of 2025.	Recipients of the Service Activity (List)  All Email users	Implication if Activity is Reduced/Fee is Increased (Narrative Decription) Staff will have to shift work assignments to expedite completing the project. Should be minimum impact.	FTE Impact (#)	Total Am	107,000.00
177 - BUSINESS SOLUTIONS	Expediting project completion to replace one-off software in 2024 instead of 2025 since there is only one department that uses KnowlegeLake.	Knowledgelake Users	Although it will not be an exact same user- experience, users will still be able to efficiently do their jobs.		0 \$	75,000.00
177 - BUSINESS SOLUTIONS	Reducing one position from an Information Technology Specialist 4 (18/12) to an Information Technology Specialist 2 (18/8) position: After evaluation of current vacant positions and the assigned duties to ensure alignment with current and future technology projects, we feel that work can be completed at an 18/8 level with minimal impact to core service delivery.  This reduction proposal is for position #842, an IT Specialist 2 position, using the funding from an employee that retired in an IT Specialist 4 position, position #4268.		May slow down some GIS and asset activities however it could create a more cohesive GIS and asset community in the City. We would like to develop a GIS Consortium to support the reduction of the GIS position from an 18/12 to 18/8 and ask other flagship GIS staff to assist in the support of the GIS system. We will continue to cover the costs and will ask the consortium to support each other. We feel with the investment of GIS and asset experts across the City, we can create a GIS and asset cooperative to support one another and take on some of the activities that the previous position oversaw. This will give agencies more autonomy in the use of these systems. IT will support the database administration, user administration and vendor relationships		\$	47,000.00

Service (Choose from drop-down list)	Reduction of one vacant position in the Web Team staffing model after evaluation of vacant positions and assigned duties to ensure alignment with current and future technology projects. The amount allocated to this reduction scenario is due to a long-term employee retirement. Due to a long-term employee retirement, we had the opportunity to evaluate the position description, the current and future IT project work needs and where we would need to re-assign talent. With that analysis, I am reassigning a team member from web development to application development to support the increase workload that will be forthcoming with several major systems migrating to the Cloud in the next few years.		This created a vacant position on the Web Team who had three core services in the position's portfolio: Support of Metro's One Bus Way API (will be discontinued in August with the implementation of the Clever system); Social Media Support & Tools (Agorapulse, Hootsuite) will be discontinued; web application development.  The discontinuation of these services will not majorly impact core continuity of operations for IT. Web project timelines will need to be adjusted by 6 to 12 months to accommodate the staffing level reduction. This change would result in a reduction in database support services and a redistribution of duties to other members of the Team, which may slow down other database administration work. It is		Iotal An	iount (\$)
	Specialist 2 position, using the funding from a long-	City Staff requesting Website	not an ideal scenario to lose the Web Team

#### **Service Identification Form**

Each agency funded by the General, Library, and Fleet funds was required to submit a list of lower priority service activities equal to at least 5% of the agency's 2025 cost to continue budget while preserving core service activities. Metro Transit and Public Health were required to submit a list of activities equal to 5% of the General Fund subsidy to those agencies.

Agencies were allowed to propose fee or charge increases on service activities as a way to meet the 5% target. Budget guidance dictated that these proposals be on service activities primarily provided to those with the ability to pay.

	Reducing one position from an Information Technology Specialist 4 (18/12) to an Information Technology Specialist 2 (18/8) position: After evaluation of current vacant positions and the assigned duties to ensure alignment with current and future technology projects, we feel that work can be completed at an 18/8 level with minimal impact to core service delivery.		May slow down some GIS and asset activities however it could create a more cohesive GIS and asset community in the City. We would like to develop a GIS Consortium to support the reduction of the GIS position from an 18/12 to 18/8 and ask other flagship GIS staff to assist in the support of the GIS system. We will continue to cover the costs and will ask the consortium to support each other. We feel with the investment of GIS and asset experts across the City, we can create a GIS and asset cooperative to support one another and take on some of the activities that the previous position

	Reduction of one vacant position in the Web Team staffing model after evaluation of vacant positions and assigned duties to ensure alignment with current and future technology projects. The amount allocated to this reduction scenario is due to a long-term employee retirement. Due to a long-term employee retirement, we had the opportunity to evaluate the position description, the current and future IT project work needs and where we would need to re-assign talent. With that analysis, I am reassigning a team member from web development to application development to support the increase workload that will be forthcoming with several major systems migrating to the Cloud in the next few years.		This created a vacant position on the Web Team who had three core services in the position's portfolio: Support of Metro's One Bus Way API (will be discontinued in August with the implementation of the Clever system); Social Media Support & Tools (Agorapulse, Hootsuite) will be discontinued; web application development.  The discontinuation of these services will not majorly impact core continuity of operations for IT. Web project timelines will need to be adjusted by 6 to 12 months to accommodate the staffing level reduction. This change would result in a reduction in database support services and a redistribution of			
	This reduction proposal is for position #3198, an IT Specialist 2 position, using the funding from a long-term employee that retired in an IT Specialist 4	City Staff requesting Website project work or social media	duties to other members of the Team, which may slow down other database administration work. It is not an ideal scenario to lose the Web Team position; however, work will be completed but in
