WHY NOW?

MASTER PLANNING

What is it?

A master plan:

- Is a forum for public input
- Provides a common vision for future management/development of a property through a public consensus building process
- Analyzes site inventory and suitability (What is there now and what can we do with it?)
- Provides programming (aka activities), development, and resource protection *recommendations*

Questions answered by a master plan: What is going to happen, where-ish, when-ish, and about how much will it cost?

A 10,000 foot view!

MASTER PLANNING

A master plan does NOT:

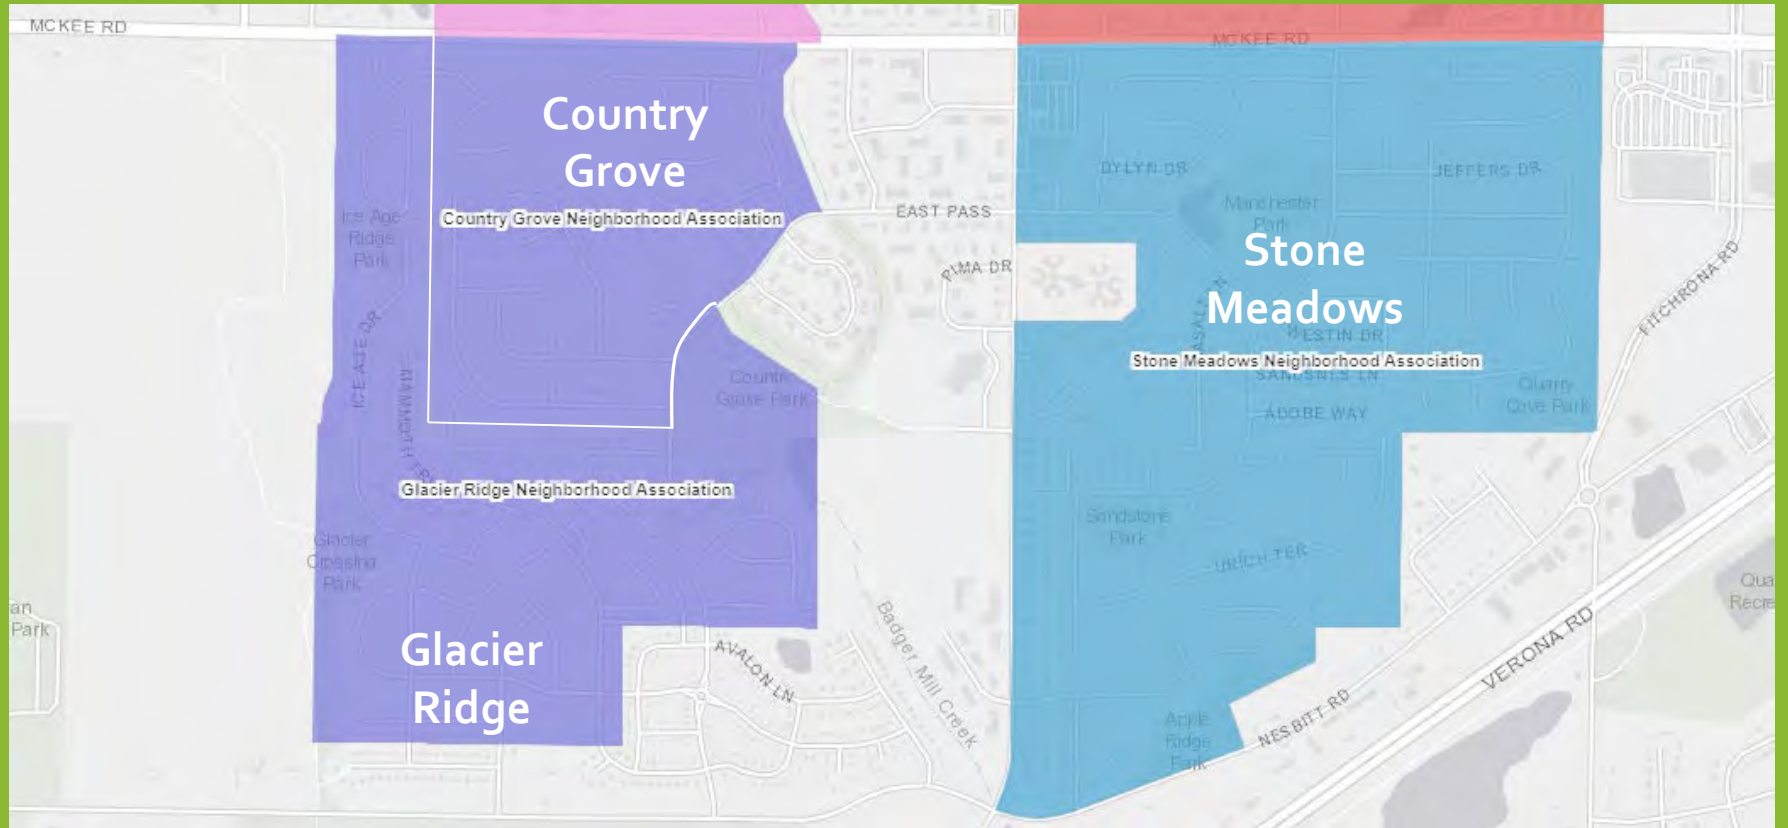

- Specify specific materials or finishes
- Designate exact locations
- Include a planting plan or tree management plan
- Contain construction drawings (which include information like dimensions, colors, products, quality requirements, etc.)

Questions NOT answered by a master plan: Who is going to build it, when (exact date), and how much will it really cost?

Singletrack Bike Trails

Singletrack has a width that varies from just a little wider than your shoulders on up to a track that's just wide enough for two bikes to pass. Many singletrack trails are open to one-way travel and wind their way through the best terrain that the landscape offers. Some singletrack trails also offer challenge elements as seen below.
