**4201 Buckeye Road**

**Madison, Wisconsin 53716**

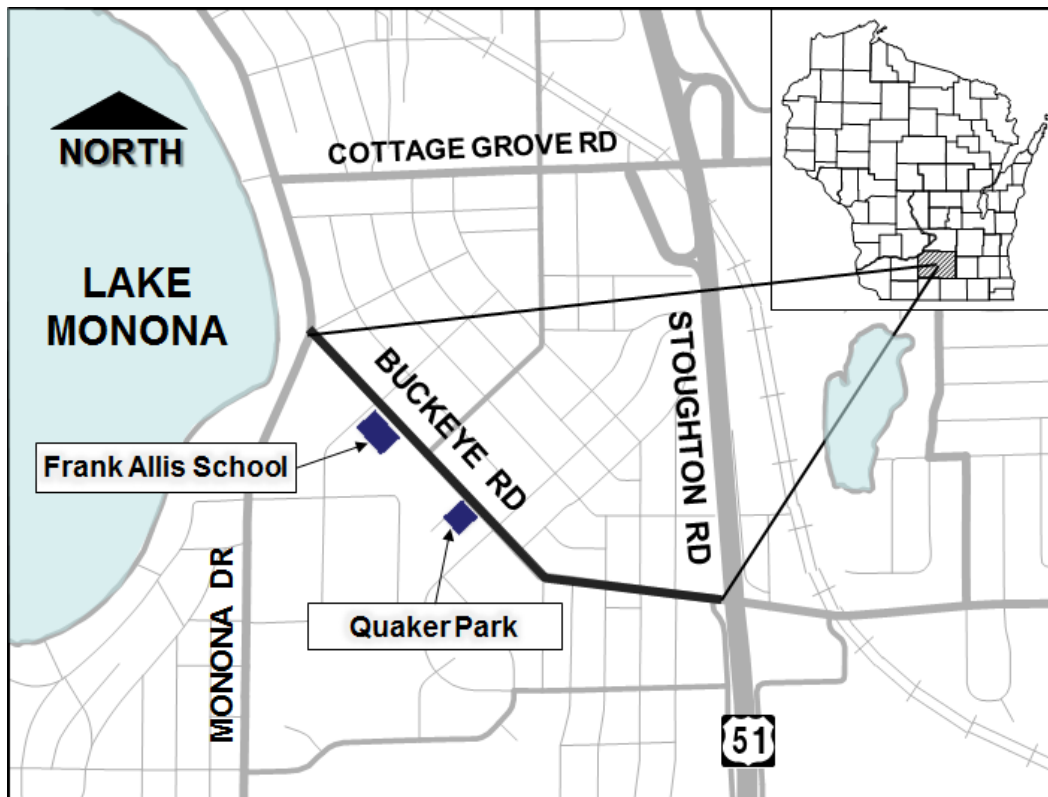

# Buckeye Road Reconstruction Project

Welcome to the second Public Involvement Meeting for the reconstruction of Buckeye Road (County AB) in the City of Madison. The project extends approximately 4,100 feet along Buckeye Road from Monona Drive to Stoughton Road. Representatives from the project team including the City of Madison are available to address your questions and concerns. This meeting is an open house format. A brief presentation will be given at 6:45 P.M. Prior to construction beginning a final public meeting will be held.

## ***Purpose of the Meeting***

The purpose of tonight's meeting is to update you on revisions to the design since the first public meeting held back in April of 2016, anticipated right of way needs and acquisition schedule, proposed construction schedule and access during construction, and as well as answer questions and listen to your comments, concerns, or suggestions.

## ***Location Map***

## ***Project Overview***

The proposed project will include reconstruction of the existing roadway from just east of Monona Drive to about 200 feet west of Stoughton Road. The proposed project includes pavement reconstruction, construction of curb and gutter, existing sidewalk spot replacements and repairs, new sidewalk where none exists along the south side of the roadway, Americans with Disabilities Act compliant curb ramps, on-street bicycle lanes, new storm sewer, new street lighting, replacement of sanitary sewer and water main, new pavement marking, and new signs. The project will include fitting existing drainage patterns into the reconstruction. A storm sewer system will be used to control stormwater.

To accommodate bicycles and pedestrians throughout the project corridor, maintain a grass terrace between the roadway and sidewalk and to avoid permanent right of way acquisition it is proposed to eliminate parking along one side of Buckeye Road except adjacent to the Frank Allis Elementary School where parking will be maintained on both sides of the roadway.

## ***Anticipated Project Schedule***

Anticipated Real Estate Acquisition	2017-2018
Anticipated Design Completion	August 2018
Public Meeting Prior to Beginning of Construction	Early 2019
Anticipated Construction Commencement	Spring 2019

## ***Traffic Control***

Based on feedback received at the first public involvement meeting it is proposed to close Buckeye Road to through traffic during construction. Closing Buckeye Road to through traffic during construction is expected to result in lower costs to build and shorter construction duration. Local access will be maintained during construction and Madison Metro will have to temporarily adjust their bus routes. Buckeye Road would remain open from Monona Drive to the Frank Allis Elementary school until summer break and construction would be completed and Buckeye Road open prior to school starting in the fall.

## ***Right of Way***

Right of way acquisition, primarily in the form of temporary limited easements, is necessary along much of the corridor to facilitate grading and matching the roadway construction into adjacent properties. In general, those properties that have sidewalk adjacent to them today typically don't require temporary easements as existing sidewalk is being spot repaired, not completely reconstructed.

## ***Assessments***

Property owners directly abutting the project will be assessed for the project's local share in accordance with City policy.

## ***Public Comments***

We encourage you to share your comments and concerns about the project. A comment sheet is included with this handout for your convenience. Please submit your comments in the comment box at tonight's meeting or mail any comments before June 16. If mailing your comments, please remember to fold the comment sheet on the lines shown, tape it shut and place a stamp on it.
