A. Scope of Project

Work will demolish a single family home and clear site located at 1313 Mockingbird Ln within the City of Madison.

B. Project Recycling Goals

The demolition project, in order to be in compliance with City Ordinance 10.185, will recycle or cause to be reused at least 70% of all demolition debris, as measured by weight, that is created during this project.

C. Description of Material Anticipated to be Generated

- a. Concrete
- b. Clean wood
- c. Drywall
- d. Windows
- e. HVAC equipment, wiring, and ductwork
- f. Siding (aluminum along house and vinyl along outbuilding on property)
- g. Electrical wiring
- h. Metal gutters
- i. Shingles
- j. Mercury containing devices (thermostats)
- k. Appliances
- l. Miscellaneous refuse and recycling

D. Worker Education

Supervisors on site will ensure signage for recycling receptacles are accurate, and that the workers are trained to place correct material into the correct location. Recycling goals will also be shared with the workers with a copy of the plan available onsite for reference.

E. Reuse

Habitat for Humanity was contacted on October 13. They performed a walk through on October 17 and reclaimed the following items for reuse in their store:

- Cabinets
- Sconces
- Counter tops
- Stained glass windows

This is a sample of a basic reuse and recycling plan so contractors can know the format and expectations for the plan. For questions about specific plan requirements for your project contact streets@cityofmadison.com.

F. Material Disposition/Material Handling

Metal

All metal items will be separated and placed into a metal recycling dumpster. Duct work, gutters, wiring, piping, and other metal items will be placed into this container. This will be hauled to XXXX for recycling.

You **must** state where the material will be recycled.
Plans will not be approved if they are missing this information.

Hazardous Materials – Mercury, Asbestos, etc.

Building was inspected and tested for universal wastes, lead, and asbestos by XXXX. These materials will be safely removed by this contractor prior to demolition.

Two mercury containing thermostats will be removed and delivered to XXXX for proper processing.

Fluorescent light bulbs will be removed and taken to XXXX for recycling.

Concrete, Asphalt, and Brick

Most of this material will be separated and crushed on site to be used as base for the new foundation. The rest will be hauled to the XXXX for recycling.

Clean Wood

Wood salvaged from joists, subfloor, and other wood will be deposited into a co-mingled construction debris recycling dumpster to be processed by the construction and demolition recycling facility located at XXXX.

Shingles

Asphalt shingles will be hauled to XXXX for recycling.

Appliances

Appliances such as the refrigerator, dishwasher, and HVAC equipment shall be removed and hauled to XXX for recycling.

Mixed Loads of Debris

Clean drywall, vinyl siding, and other recyclable construction debris (such as the clean wood noted above) shall be placed into a comingled recycling dumpster provided by XXXX to be hauled to their construction and demolition recycling facility.

G. Compliance

The demolition contractor shall monitor and track all loads of material. Upon completion of the project the compliance report, which is available on the Streets Divisions' website, shall be completed. Appropriate weight tickets and/or invoices will be included with the compliance report when it is submitted.
